MAX.	Dates	57	34	39	43.5	1.00	0.5	0.0	The rain gauge used in observations from 1958 to 1984 was about 2.5 - 3.0 inches square at the top. It was tapered to a smaller size at the bottom that exaggerated the scale more at the bottom than the top. This gauge worked poorly to measure snows particularly if they were > 3 or 4 inches. This gauge was then replaced with a 4 inch plastic gauge that was scaled in hundredths of an inch on the inside cylinder.

		MAX.	MIN.	RANGE	MEAN	Liquid	Frozen	GROUND	
Jan-01	Mon	47	30	17	38.5	0.09			This is from Dale Enterprise Records as it was too much snow for the 79 year old observer on Oxygen to try to get out and measure the snowfall. She thought it was about as much as was recorded on the 5th and 6 of March 1962 or a little more than the Ash Wednesday Storm
