Nov 1958	DRIZZLE	RAINBOW	HAIL	THUNDER	T. SHOWER	T. STORM	HAZE	November - 1958 REMARKS FOR THE DAY
Nov-01								
Nov-02								Low barometer and the lowest high temperature since April 11, 1958
Nov-03								
Nov-04								
Nov-05								
Nov-06								
Nov-07								Paper thin ice
Nov-08								Coldest since March 11, 1958
Nov-09								Lowest barometer since April 6, 1958
Nov-10								
Nov-11								
Nov-12								
Nov-13								
Nov-14								
Nov-15								
Nov-16								Warmest since October 18, 1958
Nov-17								First big snowstorm in the Rockies this fall
Nov-18								
Nov-19								
Nov-20								Cold front passed us today
Nov-21								Ice 0.5 inches thick last night
Nov-22								0.5 inch ice again today
Nov-23								Coldest since March 11, 1958
Nov-24								
Nov-25								
Nov-26								A strong cold front passed today
Nov-27								Lowest maximum temperature since March 25, 1958
Nov-28								3/8 inch ice and the lowest maximum temperature since March 25, 1958 - trace of snow
Nov-29								
Nov-30								Very low temperature and a high barometer and 0.75 inches of ice this morning

<p>The rain gauge used in observations from 1958 to 1984 was about 2.5 - 3.0 inches square at the top. It was tapered to a smaller size at the bottom that exaggerated the scale more at the bottom than the top. This gauge worked poorly to measure snows particularly if they were more than 3 or 4 inches. This gauge was then replaced with a 4 inch plastic gauge that was scaled in hundredths of an inch on the inside cylinder.</p>

<b>DRIZZLE</b>	<b>RAINBOW</b>	<b>HAIL</b>	<b>THUNDER</b>	<b>T. SHOWER</b>	<b>T. STORM</b>	<b>HAZE</b>		Nov. was a very dry month the driest at Dale Enterprise in 25 years and the driest here since 1956.

The rain gauge used in observations from 1958 to 1984 was about 2.5 - 3.0 inches square at the top. It was tapered to a smaller size at the bottom that exaggerated the scale more at the bottom than the top. This gauge worked poorly to measure snows particularly if they were more than 3 or 4 inches. This gauge was then replaced with a 4 inch plastic gauge that was scaled in hundredths of an inch on the inside cylinder.
