NUM		31	31	31	31	4			
AVE.		72.03	43.00	29.03	57.52				This month's Observations are all from Dale Enterprise
MAX.	Dates	86	57	50	71.0	0.32	0.0	0.0	The rain gauge used in observations from 1958 to 1984 was about 2.5 - 3.0 inches square at the top. It was tapered to a smaller size at the bottom that exaggerated the scale more at the bottom than the top. This gauge worked poorly to measure snows particularly if they were > 3 or 4 inches. This gauge was then replaced with a 4 inch plastic gauge that was scaled in hundredths of an inch on the inside cylinder.
