

24-hour Observed Snow Fall Middle Atlantic River Forecast Center

Ending Mon Jan 17, 2022 at 07 AM EST

These reports are not checked for errors.

□ MARFC Forecast Area □ State Boundaries □ County Boundaries

This wasn't much of a storm for the Richmond area as it was too warm and the track of the low put Richmond in the warm sector of the low pressure. Areas to the west had the greatest totals as the map shows. One place in SE Ohio reported 27 inches which was the highest total in the news. Springfield Park's total frozen precipitation was only 0.9 inches.

"The I-95 corridor has pretty much been the dividing line between rain and snow. The snow has really been in interior sections and all the rain along the coast," Gray said on CNN.

She added that the areas getting rain are experiencing "a miserable rain" with temperatures in the low 40s and some 40 mph winds.

After the systems of snow and rain wrap later today in the East, the cold is going to set in, with high temperatures today only in the upper 30s, Gray said, adding that temperatures in the mid-west will not even reach above freezing.

Drivers warned to stay home due to slick roadways

From CNN's Kelly McCleary

Roads will remain dangerous Monday across much of the Southeast, especially on overpasses and at higher elevations, CNN meteorologist Michael Guy said.

Temperatures at or near freezing will keep roads slick in Knoxville, Tennessee, and Asheville, North Carolina, and areas to the north through central Ohio. There could also be icing issues Monday in places including Winston-Salem, North Carolina; Roanoke, Virginia; and Charleston, West Virginia, Guy said.

The governors of South Carolina, North Carolina and Virginia activated members of the National Guard to help with storm response.

"They're equipped with emergency response vehicles that can move through the snow," North Carolina Gov. Roy Cooper said Sunday of the 200 Guard members deployed in his state. "As much as 8 to 12 inches of snow has fallen in some counties, and significant icing is causing trouble in the central part of the state."

North Carolina authorities responded to more than 400 crashes Sunday; State Highway Patrol Spokesperson First Sgt. Christopher Knox told CNN Sunday night. Two people, both 41 and from Myrtle Beach, South Carolina, were killed Sunday morning on Interstate 95 in Nash County after their vehicle left the road and struck trees in the median, he said.

"Exceeding a safe speed for the conditions is the proximate cause of the collision," Knox said. "Weather at the time was a mixture of wintry precipitation."

In South Carolina, 120 service members were activated and many have been assisting stranded motorists, tweets from the South Carolina National Guard show.

And in Virginia, 75 service members were staged for storm response, including "personnel with chain saws for clearing fallen trees and heavy-duty tactical vehicles capable of traveling through deep snow at key locations," the Virginia National Guard said in a news release.

Virginia State Police responded to nearly 1,000 traffic crashes and disabled vehicles Sunday across the state the agency said. The incidents were "mostly vehicle damage," and there were no reported traffic deaths, it [said in a tweet](#).

Accidents also were reported Sunday across north Georgia, the National Weather Service office in Atlanta reported, and Gov. Brian Kemp asked residents to stay off the roads.

"Potential for black ice tonight with the temperatures dropping down into the 20s, so please stay off the roads tonight and tomorrow, if at all possible. It's going to be very treacherous in a lot of parts of our state," Kemp [said Sunday on Twitter](#). "Also, the potential for downed power lines is very high right now. So, the less traffic we have on the roads the easier it is for our partners to clear the roads and restore power."

More than 215,000 people are still without power on the East Coast

From CNN's Roxanne Garcia

There are currently 217,089 customers without power in 11 states across the East Coast due to a two-day winter storm event, according to [PowerOutage.US](#).

These are the states dealing with the biggest outages:

- South Carolina: **32,768**
- North Carolina: **31,432**
- West Virginia: **24,183**
- Georgia: **23,414**
- Pennsylvania: **19,679**

Nearly 90,000 customers remain without power in the South

Flight cancellations by the thousands have continued into Monday due to a winter storm that hit major hubs as it moved up the East Coast.

As of 6:45 a.m. ET, US airlines have canceled 1,270 Monday flights across the country, according to flight tracking site FlightAware.

Airlines canceled 3,058 flights nationwide on Sunday, the most flights since Jan. 3.

The most cancellations are in Charlotte, where more than 30% of all departures and arrivals have been canceled Monday. On Sunday, more than 90% of all Charlotte arrivals and departures were canceled.

Charlotte/Douglas International Airport is a major hub for American Airlines which canceled 23% of all flights Sunday, according to FlightAware. About 28% of all Sunday departures from Atlanta Hartsfield-Jackson International Airport, the largest hub for Delta Air Lines, were canceled.

Delta, American, United and Southwest have all issued travel so customers who are impacted by the storm can rebook free of charge.
