

**The temperatures are the same on the data from the NCDC and from XMACIS but the addition is not correct for the maximum column on the NCDC data. It looks like they superimposed the numbers on the maximum column.**

# Climatological Data for RICHMOND INTL AP, VA - December 1952

Click column heading to sort ascending, click again to sort descending.

Only the addition is wrong in the maximum column

Date	Max Temperature	Min Temperature	Avg Temperature	Avg Temperature Departure	HDD	CDD	Precipitation	Snowfall	Snow Depth
