

February 7, 1967

The Richmond International Airport had only 5.6 inches on the 6th and 7th but had an additional 6.4 inches on the 9th and 10th.

A strong low pressure system created near blizzard conditions in the middle Atlantic region. The brief, but intense storm produced 10 to 12 inches of snow across Washington area. Light snow broke out during the evening of February the 6th. The snow remained light to moderate through the night, and then became heavy around daybreak. Snow accumulated at 1 to 2 inches an hour between 6:00 a.m. 11:00 a.m. and quickly ended around noon on the 7th. The storm dumped 10.3 inches of snow at National Airport and 11.7 inches at Dulles generally, 10 - 12 inches of snow fell throughout the area. .
